CORE COMPETENCIES

AR/VR   Python   C/C++   UI/UX   Java   Web Development   JavaScript   Data Structures

Github   SQL   Game Development   3D Modeling   Public Speaking   Team Management

EXPERIENCE

Bengaluru, KA

Exposys Data Labs | 1 Month(s)
Python Intern
- Programmed an application that translates text to more than 164 different languages globally.
- Inclusion of translation APIs for smooth and 90% accurate translations.
- Introduced simple, rapid and spatial improvements in GUI by using Tkinter.
- Integrated extensive support for 24 new lingoes recently.

Grenoble, France

Adaptiv.me | Current Intern
Software Intern
- Assembled tools using Back-end by applying various UI/UX tools to accelerate workflows by 18%
- Computed Content Managing System (CMS) to monitor over 663 record operations.
- Build REST APIs, 3+ JavaScript frameworks, and applications like Github, Retool for rapid production.
- Coordinated and corresponded to teamwork with 2+ members of the team.

EDUCATION

2019 - 2023
Hyderabad, India

Muffakham Jah College of Engineering and Technology
B.E INFORAMTION TECHNOLOGY
CGPA 8.2 / 10

2017 - 2019

Sri Chaitanya Kalasala
MPC (TSBIE)
Percentage 91 / 100

LEADERSHIP

Horizon Chairperson
HORIZON MJCET
📅 2022 - Present
- Established and addressed the first club to centralize ideas on AR/VR, Blockchain, Web3 and Game Development.
- Administrated and scrutinized events for over a group of 30 members in the team from different branches and batches.
- Manoeuvred real-life applications and 6+ projects with the team in various areas.

LEADERSHIP

ACM Logistics Head
ACM International Chapte

📅 2022 - Present

- Monitored all 21 club members to grow and institute improvement initiatives in the logistics procedures of the club.
- Demystified procedures with the team to produce capital and optimize budgets for logistics operations up to 20%.
- Engaged with 6+ exec members in carrier management processes such as selection, qualification, or performance evaluation.

ACM Tech Team Member
ACM International Chapter

📅 2021 - 2022

- Generated agendas for each event that includes a mix of industry expertise to provide insights on team development.
- Served all 8+ departments to plan, flourish event objectives, and conduct various events.
- Aided 200+ attendees simultaneously with tech or other issues that may have occurred during or after events.

PROJECTS

Python development
- Coded for web automation and scraping using selenium, BS4, and insomnia increasing productivity up to 80%.
- Structured software development employing Python Tkinter for GUI interface.

IoT Applications
- Assembled and constructed cost-efficient up to 30% lesser, real-life IoT applications.
- Incorporated projects with AR/VR applications using Vuforia Engines increasing traction by at least 20% .

AR/VR, Game development, 3D Modeling:
- Mastered 3D modeling & designing using Blender, Game development in Unity.
- Engineered and melded AR/VR application/filters into social media grabbing 30% more interest from the user.

Web Development:
- Developed over 3+ web-based applications including front-end and back-end development .
- Designed and partaken in website development using HTML, XML, CSS, and JS

TRAINING / COURSES

Complete Bootcamp Python Hero to Zero.   **Advanced Software Engineering**
